

A Pelvic finite-element assembly & soft tissues

- Anterior SIJ lig.
- Interosseous SIJ lig.
- Sacrospinous lig.
- Posterior SIJ lig.
- Sacrotuberous lig.
- Pubic ligaments

Habitual Locomotor Loads (Standing)

Bilateral standing

2 × 400 N vertical
Acetabular notches

Unilateral standing

1 × 800 N vertical
Right acetabular notch

B₁ Inlet plane (superior view)

Pelvic Inlet Diameters

- Conjugata vera (AP): 123 mm
- Transverse diameter (ML): 131 mm

B₂ Outlet plane (inferior view)

Pelvic Outlet Diameters

- Biischiadic diameter (BIS): 103 mm
- Bituberous diameter (BIT): 132 mm

Parturition-Motivated Proxy Loads (Birth Canal Transit Stages)

Inlet ring expansion

±400 N lateral
Iliopectineal inner ring

Tuberosity distraction

±400 N lateral
Ischial tuberosities/spines

AP outlet distraction

±400 N anteroposterior
Pubic crest & SCJ
