

A Pelvic FE assembly & ligaments

Fixed boundary: S_1 facet ($u = 0$)

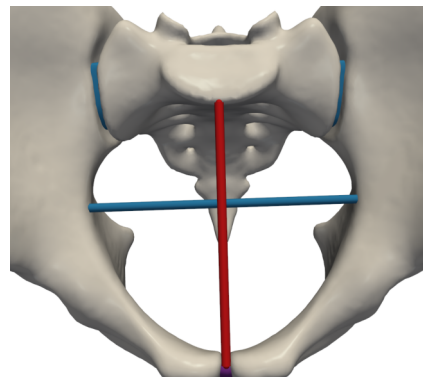

Pubic symphysis
(fibrocartilage disc)

Sacrospinous joint
(articular cartilage)

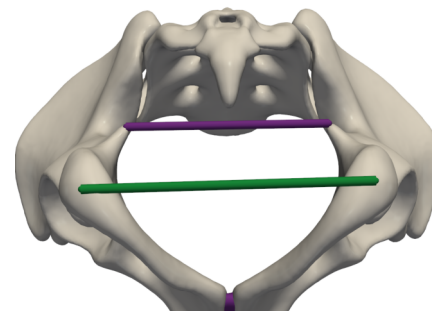

- Anterior SIJ lig.
- Interosseous SIJ lig.
- Sacrotuberous lig.
- Posterior SIJ lig.
- Sacrospinous lig.
- Pubic ligaments

B₁ Inlet plane diameters

AP: Conjugata vera (123 mm)
ML: Transverse diameter (131 mm)

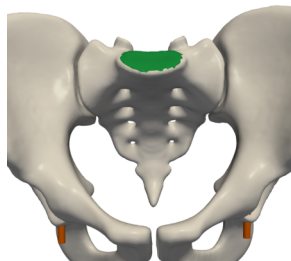

B₂ Outlet plane diameters

BIS: Biischiadic diameter (103 mm)
BIT: Bituberous diameter (132 mm)

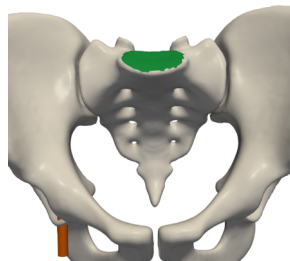

Habitual Locomotor Loads (Standing)

C₁ SP2leg stance

Bilateral standing
2 × 400 N vertical

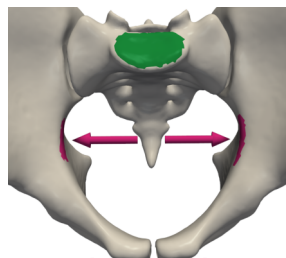

C₂ SP1leg stance

Unilateral standing
1 × 800 N vertical

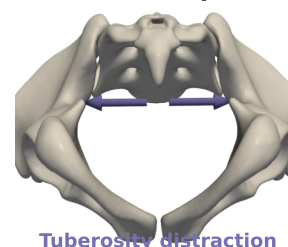

Parturition-Motivated Proxy Loads (Labor Stages)

D₁ LAB₁ (Inlet)

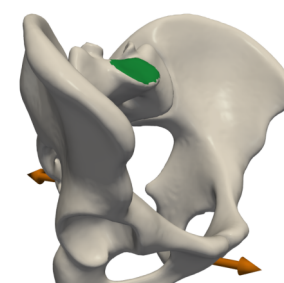

Inlet expansion
±400 N lateral

D₂ LAB₂ (Midpelvis)

Tuberosity distraction
±400 N lateral

D₃ LAB₃ (Outlet)

AP outlet distraction
±400 N anteroposterior
